Private Area Description

European DataWarehouse (ED) implemented a private area to collect information including Loan Level Data (LLD) and relevant documentation, particularly for the following instruments:

1. Credit claims used as repo collateral in the Eurosystem collateral framework
 1. Four main jurisdictions
 1. France
 2. Ireland
 3. Italy
 4. Portugal
2. Private ABS transactions
3. Whole Loan and guarantee portfolios
4. Structured Private Repo transactions

More than 100 private transactions from several large financial institutions have been created in the ED private area from across the above jurisdictions

Benefits of the Private Area

The main advantage of the private area is the **controlled transmission of the information**

- Access to the relevant data is fully managed by the Data Owner (DO) who is responsible for authorising access to Data Users (DU). The authorisation can be modified regularly
- The legal framework for the transmission and dissemination of the information is governed by specific customer agreements
- Access can be assigned to existing ED registered users or any new users after signing the specific customer agreement (at no additional cost for investors)

The data templates used in the private area are the ECB templates or variations of the respective ECB templates adjusted to individual customer specifications

The same upload and download channels that are used in the public area can also be used in the private area

Even though the loan level data (LLD) of private transactions is currently not available through the ED Cloud, the LLD can be used for benchmarking in the ED Cloud using the import of external LLD functionality in the comparison tab

Accessibility

Easy and user-friendly web-based access

Functionality

Continuous software enhancements and developments

Reliability

Robust software with ongoing support

Integrity

Legal framework for accessing, uploading and downloading information

Storage of Relevant Data

- ED regularly collects documentation and data according to existing ECB and EBA templates and taxonomies
- The underlying assets could be:
 - a) performing or non-performing loans
 - b) ABS with residential mortgages, loans to small and medium enterprises, auto loans, consumer loans, or leases as underlying assets
 - c) collateral for repo transactions

Security and Tracking

- The Data Owner (DO) as a reporting entity can create deals with a specific ED Code and upload the data
- The DO can alternatively assign a separate Data Provider (DP) to upload the relevant information into Edwin
- Once the deal is created, ED keeps a clear log of the uploads, downloads and a full data back-up for future recovery
- Additional reporting services are available upon request

Controlled Transmission

- The private area is designed to enable controlled transmission of the information
- Access to the relevant data is fully managed by the DO who is responsible for authorising the access to Data Users (DU). The authorisation can be changed at any time
- The legal framework for the transmission and dissemination of the information is governed by specific customer agreements

Transaction data can be uploaded file-by-file and stored in Edwin

- An integrated **web application** for the seamless analysis and upload of the loan level data (LLD)
- It allows Data Providers to **pre-screen** and **analyse the LLD file** and **upload it directly to EDwin**
- Currently accepts CSV, XML and Excel formats
- API users can use EDitor to analyse the LLD file, while using the API to upload the file to Edwin
- Private deals (such as ACC) can be also uploaded through EDitor
 - ✓ Schema checks
 - ✓ Rule checks

What's Next for EDiT in 2018

Implementation of Additional Credit Claim (ACC) Rule Sets

- ❑ ED implemented ACC rule sets for selected asset classes (RMB and SME) in EDiT:
 - > **150** rules for **ACC SME**
 - > **360** rules for **ACC RMB**

- ❑ The process for uploading ACC portfolios as well as the analysis is the same as for the ABS deals

Integration of the Tracking System into EDiT

- ❑ The tracking system will be fully integrated into EDiT in the upcoming release

Overview of data quality checks for ACC RMB

- The graph below shows the average breakdown of the ACC validation rule set by type of validation check

1. **Rule result drill down:** users can download loan-level data (LLD) for each rule result without the need of opening submitted files
2. **Graphical interpretation:** rules allow users to display results in a form of a chart
3. **Custom-built environment:** data quality management is run on the ED server, designed specifically to perform data quality checks quickly

1. **Data Remediation:** it is possible to review the LLD files before publication and address potential data quality issues multiple times
2. **Cost effective and standardised templates:** according to the Eurosystem Additional Credit Claim RMB and SME templates*

* The ECB ACC templates are available at https://www.bancaditalia.it/compiti/polmon-garanzie/gestione-garanzie/Templates_dati_anal_port_crediti.zip

ED tested a sample ACC submission with 124,450 residential mortgage loans:

- In this randomly selected file 31 failed rules were identified for a total of potential data quality issues affecting approximately 92% of the loans

Major rules that failed:

Original LTV cannot be reconciled using other fields in the ACC RMB template:

- AR135 | Original Loan to Value | IF $AR135 \neq (AR66 \text{ (OBAL)} / AR136 \text{ (Valuation Amount)} * 100 + -5$ where $AR135 \neq 0$

Combination of income sources with a total annual earnings lower than €2,000 for employed borrower

- AR26 | Primary Income | if $AR26 + AR28 + AR76 + AR154 < 2,000$ if $(AR21 \neq 4,6,7$ or $AR130$ not in (2, 3)) where AR26 is not 'ND%' for active loans

Payment due higher than €100,000 for non bullet loans

- AR71 | Payment Due | $> 100,000$ and (AR72 is in (1,2,3,4,5,10,11,12,13) for active loans

Duplicate entries for borrower IDs more than five times

- AR7 | Borrower Identifier | Duplicate more than 5, excluding ND values

Fees for the creation of an ACC private portfolios in Edwin are as follows:

- One-time upload and administrative fee (invoiced on issue of ED Code) € 8,000 per portfolio
- Annual management and surveillance fee (payable in advance) € 6,000 per portfolio

Fees for ACC Data Quality Checks

The following fees are charged for the data quality verification service for each ACC portfolio:

- One time upload and administrative fee (invoiced on issue of ED Code) € 15,000 per portfolio
- Annual data quality management fee (payable in advance) € 3,000 per portfolio

To request data quality checks for a portfolio of ACC RMB or SME, please contact your dedicated analyst indicating the ED Code for the portfolio that you would like to monitor on a regular basis.
